Accessing a Record

When accessing the Client’s View in Rio you may see an information prompt.

Set DCR Consent

DCR Consent Status Selection

☐ Consent Given - The client has given their consent to share their information between NHS Organisations.

☐ Consent Withheld - The client has declined to give their consent to share their information between NHS Organisations.

☒ Implied Consent - The client has not stated a preference with regards to consent to share information between NHS Organisations. Consent to share is implied.

This should be ignored as the user will be unable to change this information. You will have access to this information via the Birmingham Care Shared Record
