Overview

iGrow is used to monitor the height and weight of a child's growth. This can be accessed as part of an Assessment form via the [Update iGrow – add new Height & Weight](#) hyperlink.

Alternatively, it can be accessed independently if required.

Locating the iGrow form

- Search for child's record
- Access the **Clinical Portal - Client's View** screen
- Locate the **Navigation** pane
- Select the **Childrens & Families Assessments** folder
- Select the **Childrens & Families** link
- Select the **Health Visitors** folder
- Click **Igrow Height & Weight Assessment Form**

Health Visitors

Safeguarding / Child Protection
Igrow Height & Weight Assessment Form
CF Dependency Link

If there has not been any previous heights & weights recorded, then a new form will display ready for you to use

However, if previous height & weight forms have been completed then continue to create a new form

- Click
- Complete as required

You must enter the Centiles and the Z score

Generating iGrow Report

- Click Weight & Height History

This generates in a report format displaying any previous completed iGrow data

- Click **Close**

Continue down the form

The BMI will automatically calculate

Viewing Historical Measurements

Continuing to complete the form also displays the historical data in tabular format

Height	Centile	Weight	Centile	Head Circumference (cm)	Centile	BMI	Last Updated Date	Last Updated By
63		7.9				19.9	04 Jul 2023 15:43	PettiJ01
		7.7	Lorem				11 Dec 2021 14:08	KawesM01
